

IF YOU HAVEN'T HEARD OUR
NAME LATELY, IT'S BECAUSE
FRESH AIR AND QUIET STREETS
DON'T MAKE HEADLINES.

If you don't hear "Montgomery General Hospital" on the 6 o'clock news, it's quite understandable.

We're nestled out in the quiet suburbs, where there are plenty of trees and parking — but not plenty of clutter, congestion, and noisy traffic.

So once in awhile, we have to toot our own horn. We've grown into one of Montgomery County's most important full-service hospitals, offering general medical, surgical, pediatric, emergency, addiction and psychiatric care, including outpatient services. Our crisis intervention line, 301 774-8888, gives you direct help 24 hours a day — for families needing alcohol, drug, or mental health counseling.

Diagnostic technology and medical imaging at Montgomery General are first rate, including nuclear medicine and nuclear cardiology — with SPECT imaging, high-tech ultrasound technology, MRI, and the latest radiology and angiography equipment.

We have special strengths in cancer diagnosis and treatment, offering both a radiation therapy center and a women's center for breast

evaluation and mammography right on our campus. The hospital also has an excellent reputation for coronary care, geriatric medicine, and orthopedics.

And if you're having a baby, Montgomery General Hospital is Stork Central Station. Especially if you enroll in Our First[®], a special, free program for first-time parents.

So, ask your doctor about all the new and exciting capabilities at Montgomery General Hospital. Or, for a list of excellent doctors in general as well as specialty areas, call our Physician Referral number at 301 598-9815, weekdays from 10 to 4.

As you can see, a hospital can offer sophisticated, personalized care whether it's downtown with the news teams or out in the quiet streets with the fresh air.

The choice is yours.
